MM Comfort Systems

Congratulations on the purchase of your new home!

Your heating and air conditioning system has been professionally installed by MM Comfort Systems. For over 40 years we've been the go-to source for staying comfortable inside your home or business by providing exceptional heating and air conditioning services. Serving all of King, Pierce, and Snohomish counties, we can help with all of your comfort needs!

We understand that today's high efficiency furnaces, water heaters, air conditioners, and high-tech thermostats can be quite complex. We would be more than happy to schedule a free homeowner orientation to ensure that you are comfortable operating all of the equipment in your new home.

Topics we will discuss include:

- Furnace operation and maintenance, including how to change filters, and how to program and operate your thermostat
- Tankless water heater operation and maintenance
- Air conditioning operation and maintenance (if applicable)

We would also like to discuss how yearly maintenance can extend the life of your equipment and how annual duct cleaning can improve the air quality to provide a clean and healthy home environment for you and your family.

If you are interested in setting up a free at-home orientation with one of our experienced technicians please email us at orientation@mmcomfortsystems.com or call us at 425-881-7920.

You can learn more about MM Comfort Systems and the wide variety of products and services we offer by visiting https://www.mmcomfortsystems.com.

Feel free to contact us with any questions. We look forward to the opportunity of meeting you and helping you feel more comfortable in your new home.

Thank you and enjoy your new home!

Sincerely,

M. Mattila
